ACKNOWLEDGEMENT

In the name of Allah, the most gracious and most merciful and Him alone is worthy of all praise. Alhamdulillah, this project paper is finally completed. Here, I would like to wish my appreciation to those who have been helping and giving me inspiration in the completion of this project.

This project could not have come into existence without the assistance of many people. I thank with my many teachers, beginning with my supervisor, Encik Syamsulhairi b. Yaakob who was helped me sharpen my mind on all the necessary ways and guide me throughout the development of this project. I should also like to thank him for teaching me the great value of my own mind, and how I might use it to illumine the society. I would like to express my appreciation to my coordinator, Dr. Norlaila Md. Noor for her insightful comments and suggestions for this project. All her inspiring ideas and comments are deeply appreciated.

My special appreciation is due to the Dean of the Faculty of Info. Tech. And Quantitative Science, Dr. Adnan bin Ahmad and the Program Head of Bachelor (Hons.) IT, Pn. Salwani Jaafar who is giving me good management services throughout my degree program. My credits are also due to the computer laboratory staff of the faculty for their most generous assistance.

To my friends specially CS220 batch December 2002 and others in the faculty, who are simply too numerous to indicate, thanks for your time, understanding and buttress. May Allah will reciprocate you for all those things.

Last but not least, to my father, Hj. Bujah b. Md. Jani @ Jaffar b. Abd. Ghani and my siblings, I would like to forward my obliged to them for their continuous support during my study period, their patience and benevolence. Thank you.

ABSTRACT

This multimedia interactive project is focused on building and developing a multimedia interactive courseware for animal discovery, in particular, for children recognize and learn about animal. This Animal Discovery introduces children to a variety of animals in a nonpencil format that makes learning fun. The project's component is to develop courseware that goes beyond the simple text and pictures multimedia so often found (i.e., has some sound pedagogical principles behind it and involves interactivity). I have chosen to use the multimedia learning courseware as my delivery platform.
